tions can be carried into full effect with advantage to the Public Service, but we are inclined to think they may, while we especially and heartily commend the first, third and seventh. We regret the Mr. Gilmer forgot to put in a little resolution of firming that 'it is expedient that the pay of Mem hers of Congress be reduced to \$5 per day or \$600 per Session, and their mileage to \$10 per hundred miles,' but the People will bear it in mind. We hope these Resolutions will be early, candidly discussed, and the most of them adopted. They were laid on the table and ordered printed.

Notes on Currency .- A traveler from New England or Central New-York starts for the South. At the Philudelphia Railroad Office he i gruffly teld that they 'do n't take New England money, nor any New-York but specie;' so he has to stand a shave on the money in his pocket. Ter hours more and he is in Washington; and here (at the Railroad) they won't take New York City bills except at 2 per cent. discount. They won't take Virginia here, nor in Baltimore, save at some eight to twelve per cent. discount. They woo't take Pennsylvania Country money in Phila delphia, nor Maryland Country in Baltimore of Washington. In short, at every stopping-place you must put your packet-book in the brokers hopper, and have the contents ground out minu

All this, be it observed, is done with a currence every where (except Virginia) redeemed promptly in specie. There is no longer a pretence that sus pension causes these inequalities. The simple fact is that we have touched bottom on Gen. Jack son's ' better currency ' of State Bank notes; and you can't select any out of the lot that you can travel twenty-four hours upon.

This will never do. We cannot stop here; we must advance or go back. Before two years the issue must be broadly presented-a 'National Pa per Currency, or an exclusive Metallic Currency This Ulster and Jacksonville contrivance, with a shave on every corner you turn, cannot b a permanent condition. If there really be not i the land wisdom to devise and virtue to maintain a sound and uniform Circulating Medium, let us go back to the devices of barbarism at once.

BT THE INDIAN COUNCIL near Buffalo has resulted in an amicable arrangement by treaty of the differences between the natives and the 'Ogde Company,' who hold a recognized right of Preemption in the purchase of their lands. The treaty of 1338, which the Indians allege to be fraudulent and invalid, has been given up, and in stead of their being bound to surrender all their Reservations for a stipulated sum and remove to the West, they are to retain their Allegany and Cattarangus Reservations, and surrender that near Buffalo only, which they are allowed two years t remove from. The Ogden Company retain the right of Pre-emption over the others of course but solemnly guarantee the absolute inviolability of the Indian title thereto, until they choose to sell it They are to have two years in which to remov from the Buffalo Reservation, and to be paid for it in proportion to the original price for the whol under the treaty of 1838. The Council was at tended by the venerable Ambrose Spencer of the part of the United States, Senator NATHAL Dixos on behalf of this State, and Hon. SAMUE: HOARE on b kalf of Mussachusetts, (which State originally claimed this territory, and is bound by compacts to guard the Rights of the Indians.)-Of course, every thing was conducted with up vightness and humanity.

BF The launch of the frigate SAVANNAR from the Brooklyn Navy Yard yesterday was a noble spectacle, and was witnessed with delight by a concourse of some six or eight thousand persons. The whole affair was admirably arranged and superintended by Com. PERICT in person, while the display of flags and streamers from the U. S. and other vessels gave life and harmony to the scene The launch was to have taken place at half-pas-8; but was necessarily delayed till the tide was at its hight, or about half-past 10, when the noble vessel glided smoothly and majestically into bedestined element, plunging lightly and rising like a bird on the crest of the wave. The Tariff, &c. at Washington.

Extract of a Letter from a Gertleman in Washington, dated May 21, 1842.

Cash duties must prevail. Jewelry raised with proper discriminations. There appears to be British bottoms! The duty on hides must be left off. They were astonished when I told them that the nonessities of the Government had brought the truth. Administration and Protectionists together. In fact with discrimination (which the President advocates) a higher Tariff will be required than the Tariff advocates would have ever asked for. The merchants should look after the Tariff-it needs care, and has bearings of great moment to them.

The Tammany folks have made a sad mistake in the Rhode Island matter It will be fatal to the leaders. All the waters of the Hudson cannot purify them. The South denounce the whole cancern. They say if a majority can change the whole form of Government in this irregular mode there is no safety for them. Virginia, Tennessee, &c., all have freehold qualifications. The unexampled progress of the Leagues is noticed by the dullest liticians, and they have ensured fair protection to Home Industry, if there is intelligence snough to make proper discriminations. Merchants, Manufacturers, Mechanics, &c. should be constantly represented here. It is impossible for members of mmittees to be conversant with the vast multiplicity of details of different occupations, and the British agents are constantly presenting wrong views and perverting. The Apportionment Bill—The Army Appropriation Bill—Attempt to reduce the Army to 6,000 men.

Correspondence of The Tribute.

Washington, Tuesday, May 24.

In Senate, to-day, the Navyhill from the House was twice read and referred. A bill reported by Mr. Hentington from the Committee on Commerce authorising the clerk of the District of Fairfield, Ct. to reside either at Fairfield or Bridgeport, was passed.

Mr. MERRICK, from the Committee on Post Offices and Roads, reported a bill authorizing the employment of certain clerks heretofore temporaelly employed in the Post-Office Dapartment.

The Apportionment Bill was taken up amended, as will be recollected, by the Senate Committee by inserting a ratio of 50,000; a provision for the representation of major fractions; and by striking out the section requiring the elections by Districts and inserting that where under the laws of a State the elections are made by Districts, the Districts shall be single, contiguous, and contain such a rep-

resentative population as is required by the ratio.

Mr. BERRIEN, from the Judiciary Committee who reported the bill,) explained the amendments and expressed his determination to vote for the the number of Representatives should first be fixe and afterward the manner of the apportionment He favored a Heuse of about 200 Members, and should move in accordance therewith, when in order, to strike out the ratio of 50,000, and insert between 60,000 and 50,000, but certainly not be-low the former. Mr. CRITTENDEN expressed his District amendment.

Mr. WALER moved the adoption of the amendment to represent major fractions, and briefly ad-

Mr. Buchasas opposed the amendment as no nly a violation of the Constitution, but of the set tled principles of the Government from its foundation, and in support of this view referred to the Veto of Washington of the Apportionment Bill He opposed Mr. Berrien's District Amendment contending that under its operation the prevalence of the General Ticket system would be inevitable Mr. Woodhung also opposed the amendment

would give New-York one additional Representa-tive. The inequalities which the small States suffered in having large fractions were more than conpensared by their representation in the Senate.
The Senate adjourned.

In the House the bill appropriating for the sup she be dead, 'while the villain who seduced her to all this agony, horror and ruin, should go altogether unpunished! Ought not such 'Statutes' to be 'Revised!'

[Ed. Tribune.

[Avg. Jourson moved to amend the enseting clause by adding a proviso that none of this or any future appropriation shall be applied to the payment of any soldier hereafter enlisted, or officer hereafter appointed, until the number of the army is reduced Mr. J. modified his amendment so as to provide for the reduction of the Army to the standard of 1221. (which Mr. A. stated to be about 6,000) in

stead of reducing it to 5,000.

Mr. Fillmore briefly explained the general provisions of the bill which appropriates for the Army as it now exists by law, and opposed the amendment, forcibly appealing to the Committee whether they were prepared at one fell swoop, and without deliberation, to cut down our Army one-half, and to turn out those now in employ. Mr. W. C. Johnson opposed and Messrs. C. H.

Mr. BLACK supported the amendment, contend ing that the Army was not now required for any service, and referring particularly to that portion of it stationed on the line between Florida and of it stationed on the line between Florida and Georgia, the recent difficulties with which relative to the murder of one of the citizens of Georgia, he referred to, calling on Government to take away such an army, who were plandering and murdering our citizens, and call out a company of Georgia volunteers, which would render much more eth cient defence.

Mr. GRANGER made a spirited reply to Mr. Black, and a defence of our Army, throwing back on the Opposition party the responsibility of the bloodshed and expense of this war; and by reference to the facts, showing that the character of this Georgia army had been unjustly impugned— that one man only thereof had been arrested on a charge of murder, and tried and acquitted by a Georgia jury. He opposed the amendment, and advocated the maintaining of the Army and Navy on a basis required by the present circumstances of the country, and the raising sufficient revesue for this purpose from imposts. Mr. Thompson of for this purpose from imposts.
